Project Experience

Client Name: monsterquote, Inc, United States

Project: <https://www.monsterquote.com>

Role: Developer / Team Lead

Project Details:

- Monsterquote is online auction services. Customer will book an appointment for window coverings for their home. They will get list of best quotes from service professionals. And based on quote price and their ratings/profile, customer will assign work to them.

Responsibilities:

- Responsible for full application development lifecycle.
- Schema design, relationship analysis, application development, code review, recommendations.
- Unit test and deploy the application.

Client Name: Alan Depauw, United States

Project: <https://www.overhaulbids.com>

Role: Developer / Team Lead

Project Details:

- Overhaul Bids is the fastest way for aircraft owners to find shops and pricing for engine overhauls and inspections. We created this website to solve the industry shortcomings that we experienced during an engine overhaul project. Now aircraft owners can enjoy a single source of pricing, reviews, and knowledge for their engine overhauls and inspections. They can save time, money, and make informed decisions.

Responsibilities:

- Responsible for full application development lifecycle.
- Schema design, relationship analysis, application development, code review, recommendations.
- Unit test and deploy the application.

Client Name: Company Product

Project: <http://reverse.auctionsoftware.com/>

Role: Developer / Team Lead

Project Details:

- Reverse auctions are auctions where the bidder is the seller and not the buyer. The bid reflects how much the buyer is being asked to pay. Web-based reverse auctions have become extremely popular for purchasing large amount of goods or services at the corporate level.
- Against popular belief, the lowest bid is not always the winner. It would be if all sellers where offering the same exact items and the buyer could consider all offer absolutely similar. In the real world, most bids will be slightly different and will always have something specific attached to them.

The simple fact that the seller is different and carry its own reputation, will suffice to make a higher bid wins against a similar offer made by a less reputable seller.

Responsibilities:

- Responsible for full application development lifecycle.
- Schema design, relationship analysis, application development, code review, recommendations.
- Unit test and deploy the application.

Client Name: DEALSCOVER PTY LTD, AUSTRALIA

Project: <https://dealscover.com.au/>

Role: Developer / Team Lead

Project Details:

- Dealscover is powered by the community for the community. We connect Deal Seekers with Deal Experts who know every nook and cranny about discovering the best available deals. Lower prices do not have to come with compromises. You set your terms; we help you find the best deals according to your terms.

Responsibilities:

- Responsible for full application development lifecycle.
- Schema design, relationship analysis, application development, code review, recommendations.
- Unit test and deploy the application.

Client Name: Sirbie, South Africa

Project: <http://sirbie.com/>

Role: Developer / Team Lead

Project Details:

- We are a vibrant and dynamic team of South Africans, based in Pretoria, who are passionate about service, quality, and getting the best deal.
- As a team, and individually, our time is precious. We know how frustrating it can be to search and enquire about professional help around the home and office. So we started Sirbie.

Responsibilities:

- Responsible for full application development lifecycle.
- Schema design, relationship analysis, application development, code review, recommendations.
- Unit test and deploy the application.

Client Name: Business Risks International (BRI)

Project: <http://app.wicomply.com>

Role: Developer

Project Details:

- BRI provides unique, independent and comprehensive services to the corporate sectors.
- This system is designed for organizations possess extensive and varied responsibilities related to risk and incident management, safety, security and liability.

Responsibilities:

- Implement functionalities according to mockups.
- Develop and improve websites.
- Develop appropriate code structures to solve specific tasks.
- Fix bugs, troubleshoot and resolve problems.
- Document the use of functionality.
- Ensure quality of products and services according to standards, processes and procedures.

Strength & Achievements

Strength:

- Capable of handling multiple responsibilities.
- A dedicated individual with excellent interpersonal skills and the ability to interact with individuals at all levels.
